

Taymaz Akbari

SOFTWARE ENGINEER

taymazak1382@gmail.com · github.com/taymakz · taymakz.ir

ABOUT

Full-stack Software Engineer with 5+ years of experience building and shipping production web applications and SaaS products. I take ownership of the full lifecycle — REST API design, database modeling, frontend implementation, and containerized deployment.

I adapt fast to new languages, frameworks, and environments — technology is a tool, not an identity. Currently most productive with TypeScript, Hono/Elysia on the backend and React/Next.js on the frontend. Also teaching programming on **YouTube (@Taymakz)**; creator of **Cafify** and **Studenthub**. Available for remote positions worldwide, or on-site in Tehran / Karaj.

TEACHING

HTML: Beginner to Advanced

2026

Comprehensive HTML course from fundamentals to advanced, produced with professional custom animations for clarity and engagement.

HTML

CSS ANIMATIONS

CSS: Beginner to Advanced

2026

Comprehensive CSS course from fundamentals to advanced, produced with full animated slides for maximum visual clarity.
